PROFESSIONAL SUMMARY

Software Engineer with 7.5+ years of experience in designing scalable backend applications using Python, Golang, Machine Learning, and Generative AI. Experienced in building microservices, AI-driven automation, and cloud-based solutions, with domain expertise in Oil & Gas and Telecommunications. Strong background in backend development, DevOps automation, and predictive analytics, with contributions to open-source through published Python packages.

SKILLS

Python: Advanced

GenAI: Intermediate

Machine Learning: Intermediate

Golang: Intermediate

Dataiku: Intermediate

Neo4j: Intermediate

Microservices: Intermediate

Oil and Gas Upstream: Intermediate

GCP: Intermediate

ARUMUGAM MAHARAJA M

Lead Software Engineer

EXPERIENCE - 7.5 YEARS

Mar 2026 — Present

Lead Engineer - GenAI Platforms, Celestica Chennai

- Designed and developed GenAI agents and backend services to automate DevOps workflows and improve operational efficiency.
- Built automation solutions for user adoption metrics, usage reporting, and analytics across multiple Generative AI platforms.
- Automated compliance reporting and governance validation workflows, streamlining compliance checks and reducing manual effort.

Mar 2022 — Mar 2026

Lead Software Engineer, Accenture Chennai

- Developed backend compute logic using Python and Dataiku, and built Golang microservices for enterprise Oil & Gas applications.
- Integrated multiple platform components and owned key backend modules, ensuring reliable and scalable system functionality.
- Built Proof of Concepts (PoCs) using Neo4j Knowledge Graphs for Oil & Gas subsurface data to enhance data relationships and exploration.
- Contributed to the OSDU data mapping platform by validating cloud releases and ensuring compliance with OSDU Data Standards.

May 2019 — Mar 2022

Software Engineer, TCS Chennai

- Developed Machine Learning models for Order and Fallout SLA prediction, achieving 85% prediction accuracy through Telecom BSS domain features.
- Collaborated with UK and South African telecom clients to deliver ML solutions, data flow designs, and business-driven enhancements.
- Built fraud detection and time series forecasting models using CNNs and unstructured data for anomaly detection.
- Recognized as a Subject Matter Expert (SME) for a customer migration project based on technical expertise and project contributions.

EDUCATION

Jun 2025 - Apr 2027

MBA - Business Administration (AI)- Online, SRM Institute of Science and Technology (SRMIST) Chennai

- Pursuing an Online MBA with a specialization in Artificial Intelligence and Data Science.
- Completed the first year with a CGPA of 9.83/10, demonstrating strong academic performance.
- Strengthened expertise in Artificial Intelligence, Data Science, Business Strategy, and Data-Driven Decision Making through industry-oriented coursework.

Aug 2015 - May 2019

Bachelor of Engineering, B.E Civil (STEM), Sona College of Technology, Anna University Salem, India

- Awarded the Silver Medal for outstanding academic excellence and top-ranking performance in Engineering.
- Achieved an 'O' Grade in all Mathematics courses.
- Pursued additional coursework in programming, software development, and databases, complementing the Civil Engineering curriculum.
- Developed a Concrete Mix Grader application using Java Swing as the final-year project, earning recognition for Best Project and Best Research Paper.

CERTIFICATION

Nov 2025 - Nov 2027

GCP Professional Cloud Architect, Google Cloud

Aug 2025 - Aug 2027

Microsoft GitHub Copilot Certified, Microsoft

Nov 2022 - Present

Dataiku ML Practitioner, Dataiku

Jun 2017 - Present

NPTEL Certifications on Geology, AI, Python, IITs in India

Jun 2022 - Present

Neo4J Certified Developer, Neo4J

PERSONAL PROJECTS

- Jan 2026

TaxCalcIndia (Open Source Python Package)

Developed and published a Python package to simplify Indian income tax calculations with reusable APIs, improving automation and developer productivity.

- Apr 2024

CivilUtils (Open Source Python Package)

Built and maintained an open-source Python toolkit for civil engineering calculations and utilities, providing reusable modules for engineering workflows.

- Present

AI Room Assistant (ESP32 + Python + IoT)

Designed an AI-powered smart room assistant integrating ESP32-based sensors with cloud services for real-time environmental monitoring and intelligent automation.
